re: EZ Transport Chair

Mr. Harris,

I observed the demonstration of the EZ Transport Chair at recent NASVH Summer Conference. The Vermont Veterans' Home historically spends over \$25,000 a year for transportation of our Veteran heroes to the local hospital and physician offices for non-emergent care.

Since purchasing and implementing the use of Harris Medical's EZ Transport Chair, the Vermont Veterans' Home saved over \$1,500 in the first two weeks of use and this figure continues to grow. Residents, staff and our transportation provider enjoy using the chair and appreciate how it acclimates to their needs for bed height transfers and sitting upright.

We appreciate saving money; however, the comfortable transportation of our Veterans is of prime importance.
